Building No 15, Block No 10, El Waha District, Nasr City, Cairo, Egypt

-Summary

I'm a dedicated full-stack developer passionate about bringing ideas to life through technology. With skills in front-end. With a keen eye for detail and a commitment to delivering high-quality code, I thrive on the challenges of web development. Whether it's building dynamic user interfaces, optimizing performance, or solving complex problems,

-Skills

•HTML5 •CSS3 •C++

•Familiar with data structures . •OOP

-Education

Faculty Of Computer and Information Science Ain Shams University

General Departement   2020 - 2024

-Projects

PacMAN Game

it is a game built using SMFL with C++ with three levels gradual dificulity.

Sentiment Analysis Project Using AI Classification

-Build a Sentiment Analysis Model •Train a model to automatically classify text data (e.g., reviews, social media posts) into positive, negative, or neutral sentiment categories.

-Understand Public Opinion •Analyze sentiment trends in the data to gain insights into public opinion on a particular topic, product, or brand.

-Using machine learning model • Support Vector Machines (SVM)
